EDUCATION

University of Maryland, College Park
Bachelor of Science, Dual Degree in Computer Science & Human Development | Minor in Business — May 2027
Awards & Honors: University Honors | C.D. Mote Jr. IAP Full-Ride Scholarship

WORK EXPERIENCE

ORACLE | TAM Software Intern — May 2026 - August 2026
- Designed and built TAM SR Insight, a full-stack AI application using Oracle Autonomous Database, Node.js, JavaScript, React, Gemini API, and Docker to analyze Service Request histories for technical issues, customer sentiment, escalation risk, and then generate evidence-backed next actions and customer responses.
- Collaborated with a cross-functional engineering team to build the backend and data layer for TAM-WIKI RAG, a multimodal enterprise RAG platform, using Python, FastAPI, and Oracle Autonomous Database to support document ingestion, embeddings, conversation storage, and tenant-aware vector retrieval.

Co-Learn Code & Mind | Robotics & AI Lab Undergraduate Researcher — November 2025 - Present
- Developed robotics-based curricula using micro:bit, VEX robots, and machine learning to collect behavioral data on how students collaborate, distribute responsibilities, and adapt problem-solving strategies in STEM environments.
- Implemented Youth Participatory Action Research (YPAR) methodologies in collaboration with UC Berkeley researchers.

UMIACS | IT Systems Administrator — May 2025 - December 2025
- Deliver frontline system operations and administration support for 1,200+ devices and 80+ faculty across a 6,000+ port networking infrastructure with mixed Linux, Windows, and macOS environments.
- Manage cloud deployments, server provisioning, hardware rollouts, and software imaging pipelines, rapidly troubleshooting configuration, compatibility, and infrastructure issues to minimize downtime.

Omal Solutions | Full-Stack Software Engineer — December 2024 - May 2025
- Designed and implemented 15+ high-fidelity Figma prototypes into fully responsive React and React Native applications, optimizing cross-platform performance and ensuring consistent UI/UX across iOS and Android.
- Integrated frontends with FastAPI, and PostgreSQL, implementing secure authentication flows and a real-time chat system powered by WebSockets for low-latency communication and live message updates.
- Collaborated in a 11-engineer team using Git/GitHub to deliver fullstack features in a fast-paced workflow.

Coding With Kids | Software Development Instructor — May 2024 - August 2024
- Taught 40+ students (ages 5-18) programming in Python, Java, C++, and Unity/Roblox Studio, delivering 100+ lessons on data structures, object oriented programming, memory management, and physics-based mechanics.
- Earned an overall 5-star instructor rating by project-based learning while ensuring parents received daily updates.

PROJECTS

Cram Cam - AI-Powered Real-Time Study Platform
- Developed a full-stack AI app using React, FastAPI, and OpenCV that detects if a user is on screen studying via webcam and their browser activity via google extension to track study focus in real time.
- Implemented gamified features including a live XP system with motivational chat and a red overlay feedback.

Zoo Baby - Unity 3D Physics First-Person Shooter (Baby vs. Zoo Animals)
- Built a fully playable FPS game in Unity within a 3-person team, developing core game systems in C# including player mechanics, combat logic, and AI-driven enemy behavior using behavior logic and Unity NavMesh.
- Utilized Photoshop to craft character sprites, background scenes, in-game objects, and interface controllers.

LEADERSHIP EXPERIENCE & ACTIVITIES

SisterToSister | Director of Marketing & Brand — May 2024 - August 2025
- Managed all socials, designed and posted 30+ flyers to promote program events, grew the instagram followers to 1k, and increased event attendance by over 50% by effective digital campaigns and consistent visual branding.
- Recruited 40+ new members and drove consistent event turnout through digital outreach and engagement.

Technica Hackathon | Community Organizer — May 2024 - November 2024
- Developed an 8-week curriculum consisting of HTML, CSS, and Javascript for 15+ members.
- Utilized tools like Google Workspace and Slack to streamline scheduling, maintain participant rosters, and track curriculum progress, ensuring all milestones were met on time.

SKILLS

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Data Science, Neural Systems and Circuits
Programming Languages: Python, Java, C, C#, C++, JavaScript/TypeScript, SQL, Assembly, Rust, OCaml, Lua
Technical Skills: HTML/CSS, React, Node.js, MongoDB, FastAPI, PostgreSQL, Figma, Unity, Blender, UX/UI, Docker, Git, GitHub, AWS, Linux, Windows, MacOS, AI Agents (CodeX (ChatGPT), Gemini, Claude), Adobe Suite (Photoshop, Illustrator),
Business Skills: Accounting, Branding & Marketing, Digital Outreach, Project Management, Information Systems
